

Stand up SPoA for outpatient services without adding clinical headcount.

SPoA isn't one challenge — it's several, and most trusts are solving each separately. One system for routing, another for A&G, spreadsheets for triage, manual chasing for everything after.

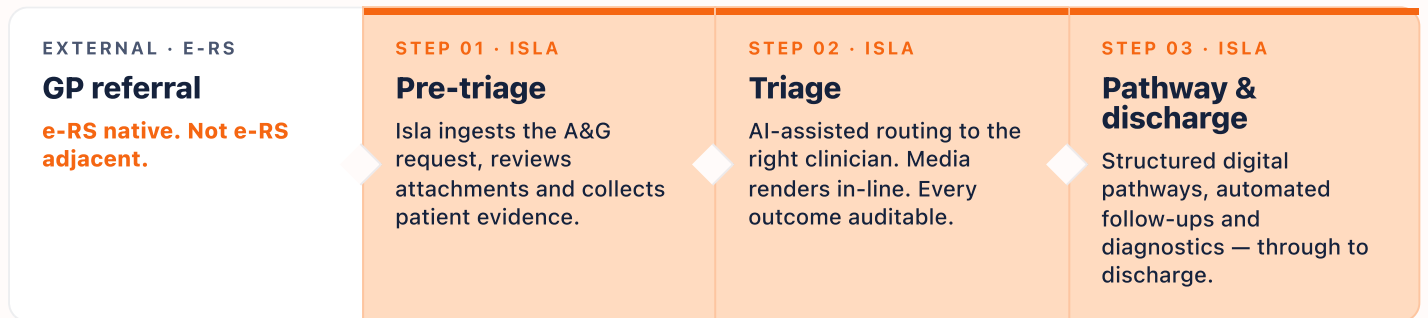

Isla is the model for standing up SPoA across your acute outpatient services — fully integrated with **e-RS** and **Advice & Guidance**. Get that infrastructure right and the gains in **RTT performance** follow — through sharper referral management, clinical triage and pathway standardisation.

- **Oct 2026**
Top 10 specialties live via SPoA
- **Mar 2027**
All elective referrals through SPoA
- **Every case**
Triage by a named, accountable consultant

HOW ISLA RUNS YOUR SPOA

REFERRAL → DISCHARGE

SPoA⁺ = seamless access + end-to-end digital pathways

WHAT YOU GET

- 
Native e-RS A&G integration
Isla pulls A&G requests straight from e-RS. No separate procurement, no workaround. Live today, ready across your specialties.
- 
Referral cohort management that protects RTT
Triage, sub-categorise and route with full visibility across services, clinicians and priority. Nothing sits idle burning clock days.
- 
Digital pathway onboarding from referral
Patients go onto structured pathways from acceptance — evidence capture, automated follow-ups, async review. Not after a first appointment.
- 
Governance & audit-readiness, built in
Named-consultant audit trails, structured responses, per-consultant SLA dashboards and ICB reporting. The evidence is already there.

Your RTT clock is already ticking.
Your SPoA should be too.

Book a walkthrough configured for your top specialties.
